Mr. Charles Kuhn, librarian
Hood College
Frederick, Md. 21702

Dear Charles,

If you are not familiar with "Secret Agenda," it centers on the Paperclip project and similar means of bringing a large number of Nazi scientists and supposed scientists here, in violation of law, at the end of that part of World War II.

I do have the high opinion of Ms. Hunt's book I express in my enclosed letter to her. Because I wanted to put a word in for her records before she can make any other disposition of them I wrote her without asking you.

It does not place you under any obligation.

The book was published a year ago. She lives in an apartment from her address (in about 1935 + lived at the other end of that block) and she may have a space problem.

The other letter I'll enclose speaks for itself.

And + love it!

Best,

Harold

Many of those Nazi scientists were wanted war criminals, too.

The book also relates very much to our space program.
